

National Consultant Information Programme (NCIP)

Get better insights into your clinical practice

- Reflect on your clinical practice
- Improve clinical quality and patient safety
- Use as evidence in your appraisal

Developed by clinicians, for clinicians, NCIP is a free data platform containing activity and outcomes data, especially for consultants.

What will you find in NCIP?

- Activity and outcomes data
- Long-term metrics including readmissions and mortality
- Pseudonymised patient records including diagnoses and procedures
- Consultant and provider-level data

NCIP covers your whole NHS practice – including NHS practice in private settings and private practice in NHS settings.

By using HES and ONS data, the dashboards are automatically populated and refreshed every quarter.

Who can use NCIP?

- Consultants
- Trust specialty clinical leads
- Medical directors
- Responsible officers

NCIP is only available to clinicians. Medical directors, responsible officers and trust specialty clinical leads have enhanced access, giving oversight of all consultants they're responsible for.

What specialties are included?

We've worked with our clinical leads, other consultants and specialty associations to create dashboards that are accurate and meaningful for each featured specialty.

- Ear, nose and throat (ENT)
- General surgery
- Gynaecology
- Neurosurgery
- Oral and maxillofacial surgery (OMFS)
- Orthopaedic surgery
- Paediatric surgery
- Spinal surgery
- Surgical dermatology
- Thoracic surgery
- Urology
- Vascular surgery
