

## Update re Stryker Cyber Attack

25<sup>th</sup> March 2026

Dear Colleagues,

Following an update this evening by NHS Supply Chain and NHS England to the BOA and Specialist Societies, stock levels are satisfactory and therefore the advice remains that trauma and elective orthopaedic procedures continue as planned.

NHS Supply Chain and NHS England are seeking clarification from Stryker as to the rates of use of existing stock and the resumption of production

NHS Trusts can reach out to their regional customer services team at NHS Supply Chain for help and advice on ordering through NHS Supply Chain systems. It would be preferable for this to come as a coordinated query from the relevant NHS Procurement teams, so the customer services team can ensure the right people are involved to find a solution. Please see the link below:

[Customer Services Teams ? NHS Supply Chain](#)

The NHS Supply Chain ICN page for this incident is a resource which is accessible to anyone. This page has formal comms which are agreed by all parties, contains useful links, and is updated on a regular basis. Please see the link below:

[Supply Issues Stryker Cyber Attack ? NHS Supply Chain](#)

Whilst the principles of this advice are identical for the devolved nations, the operational details will differ and be led by local arrangements.

There will be a further meeting on Friday, 27th March and we will issue updated guidance if appropriate.

Yours faithfully

Fergal Monsell President, BOA

On behalf of :

Xavier Griffin	President, OTS
Tim Board	President, BHS
Alasdair Santini	President, BASK
Mark Falworth	President, BESS
Amir Qureshi	President, BLRS
Rob Pollock	President, BOOS
Hiro Tanaka	President, BOFAS
Wee Lam	President, BSSH
