CRYO PRO™ XL

COLD COMPRESSION
THERAPY

COLD COMPRESSION THERAPY

Cold compression therapy works by constricting the blood vessels, which in turn reduces swelling and inflammation. The Cryo Pro™ XL control unit features automated compression and easy set-up for patient comfort.

The Cryo Pro™ XL Unit features nine different modes for varying pressure and time sessions. You can choose from 3 different modes of pulse compression – low, medium and high – to accommodate your cold compression needs. With its dual hoses it allows you to use two wraps simultaneously.

Cold compression therapy can also calm muscle spasms, minimise bruising, and soothe nerve endings, helping encourage quick and effective healing for a variety of muscle, tendon, and ligament injuries.

In addition, cold compression can help reduce a patient's dependence on painkillers following injury.

- Provides pain relief
- Reduces swelling and inflammation
- Prevents or limits bruising
- Slows or stops bleeding

PORTABLE DESIGN

The Cryo Pro™ XL has been designed to be convenient wherever you want to use the unit. Portability is not an issue for the Cryo Pro™ XL.

The unit comes with a handle which is designed to balance when water and ice are in the reservoir. The Cryo Pro™ XL can be powered via a portable power bank, allowing you to use its pulse compression therapy anywhere, anytime.

The Cryo Pro™ Portable Bag is designed to hold the unit and wraps with a comfortable and adjustable strap. The bag features additional storage space to fit the drain gadget, portable power bank, dual hoses and any additional wraps.

'encourage quick and effective healing for a variety of injuries'

SIMPLE TO USE

The Cryo Pro™ is a simple-to-use product, requiring only ice, water, and power (mains or battery). The wraps are simple and easy to apply – one size fits all with the hook and loop fixing allowing the wraps to be adjusted to fit each patient correctly.

The Cryo Pro™ XL is simple to empty and clean, removing the water from the main unit is easy due to the removable lid. The wraps are easy to drain, using the draining gadget.

WRAPS

The Cryo Pro™ XL enables you to target specific areas of pain or swelling with our full range of wraps. These include 360 Knee, Shoulder, Ankle, Universal, Full Leg, Full Long Leg and our newest wrap the Back and Hip wrap.

Back and Hip Wrap

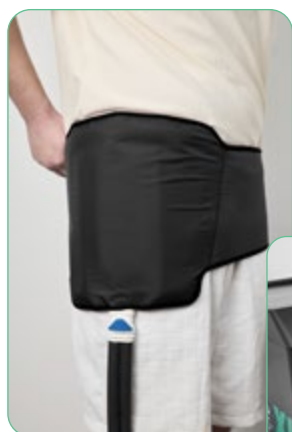

Can be applied and worn similar to a belt over the affected areas.

Extension strap

To be used to allow for more room and space when wearing a wrap for maximum comfort during recovery.

Dual Hoses

To be used with the Cryo Pro™ XL to allow for two wraps to be used simultaneously.

"The Cryo Pro™ is the perfect machine to use for my rehab and recovery. So easy to use, provides excellent pain relief and keeps inflammation away so I can continue to run, work out and play golf."

**Danny Mills,
Footballer & Sports
Personality**

"The dr. aktive Cryo Pro™ has been an absolute game changer for me. I use it before and after training/competition to help aid my recovery. Having previously had various shoulder surgeries, and niggles I have to make sure I stay on top of my shoulder health to allow me to perform at my best in the pool. The Cryo Pro is so easy to use, and I love the fact you can use it on either mains or battery, making it super convenient to use."

**Suzanna Hext,
Paralympian**

"Lasswade RFC started using Cryo Pro™ at the beginning of the season.

Our coaching and physio teams have been delighted with them and have found that when using Cryo Pro™ as part of the recovery program players are getting back to full fitness in a much quicker time frame.

They're easy to use and can be utilised either as part of a scheduled session or at the pitch side in immediate response to any injury."

**Billy Knowles,
Club President,
Lasswade RFC**
