

OrthoFoam SRE Optimal Recovery

Indicated following foot and ankle surgical cases for application in theatre or recovery or even preoperatively for trauma cases to ensure reduction of swelling. The ergonomic design ensures patient comfort, with stable elevation at heart level and without strain on the knee or hip.

Also Available in the Professional Series

OrthoFoam Adult Ramp

Indicated for all surgical cases where elevation is necessary without offloading the heel.

Elevator OrthoFoam Foot Holder

Indicated for use in surgery for foot and ankle procedures, from trauma to total ankle replacements.

Enhanced Home Recovery

Recover from your surgery in the comfort of your own bed with the HomeFoam version of our Ortholove[®] Professional Series SRE (Swelling Reduction Elevator).

Reducing postoperative swelling enhances healing and recovery and our beautifully designed HomeFoam is recommended by expert surgeons to keep your foot at the perfect height whilst relieving stresses on your knee, hip and lower back.
