

# Cost Savings & Compliance

## From Insight to Impact.

CARESCAN.

Award-winning solution designed to enhance patient safety and streamline operational efficiency.

### Why it matters

#### Operational Efficiency & Cost Savings

- Reduces waste through accurate stock and expiry tracking
- Supports patient level costing through movement away from standardised costings, with full incorporation into your Trust's Costing Model
- Reclaims clinician hours for patient care (4,000+ hours saved in one Trust)

#### Visibility & Traceability

- Tracks every item scanned, linking product, patient, procedure, and supplier
- Provides real-time access to expiry, laterality and recall information
- Enables real-time visibility into usage, stock levels, and product movement, with high-cost device traceability to prevent lost revenue from reimbursement
- Full audit trails, with WHO, NATSSIPS & LOCSSIPS digital checklists

#### Improved Compliance & Safety

- Aligns with Scan4Safety initiative
- Highlights non-compliant or expired medical devices instantly
- Integrates with National Joint Registry
- Streamlines Medical Devices Outcomes Registry (MDOR) submissions

### Technical snapshot

#### Compliance

DCB0129, ISO27001, DTAC, Cyber Essentials Plus

#### Pricing Model

Available via G-Cloud framework

#### Integration

HL7 and Active Directory

#### Implementation

Modular, onsite training and onboarding

#### Support

Fully supported with ongoing assistance

### Real-world impact

We work closely with Trusts to drive impactful change, with many applications. For example:

- Renal Dialysis
- Resus Trolleys
- Orthopaedics
- Loan Kits
- Inventory Management

## Why CareScan?

- ✓ Developed by the NHS for NHS settings
- ✓ Improves patient-level costing and inventory accuracy
- ✓ Enables data-driven purchasing and planning
- ✓ Enables rapid response to product recalls and compliance issues
- ✓ Supports real-time data capture and reporting
- ✓ Smart implementation, future-proof and scalable
