

Saturday 7th January								
08:30	Registration							
09:00	Welcome							
	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7	Group 8
09:15	Simulation 1a Initial Assessment and Management of Trauma Patient	Simulation 1b Initial Assessment and Management of Trauma Patient	Simulation 2a Initial Assessment and Management of Spinal Trauma	Simulation 2b Initial Assessment and Management of Spinal Trauma	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture
10:00					Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries
10:45	Break							
11:00	Simulation 2a Initial Assessment and Management of Spinal Trauma	Simulation 2b Initial Assessment and Management of Spinal Trauma	Simulation 1a Initial Assessment and Management of Trauma Patient	Simulation 1b Initial Assessment and Management of Trauma Patient	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma
11:45					Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome
12:30	Plenary Lecture: Second Victim							
13:00	Lunch							
13:45	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Simulation 1a Initial Assessment and Management of Trauma Patient	Simulation 1b Initial Assessment and Management of Trauma Patient	Simulation 2a Initial Assessment and Management of Spinal Trauma	Simulation 2b Initial Assessment and Management of Spinal Trauma
14:30	Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries				
15:15	Break							
15:30	Case Discussion 3 Compartment syndrome	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma	Simulation 2a Initial Assessment and Management of Spinal Trauma	Simulation 2b Initial Assessment and Management of Spinal Trauma	Simulation 1a Initial Assessment and Management of Trauma Patient	Simulation 1b Initial Assessment and Management of Trauma Patient
16:15	Case Discussion 4 The good, the bad and the ugly: Biomechanics and principles of fracture	Case Discussion 1 Neurovascular injuries	Case Discussion 2 Physiological response to trauma	Case Discussion 3 Compartment syndrome				
17:00	Close
